Please Take Note

NO PERSONS ALLOWED IN MY OFFICE

By Order: Hendrina Frazer
To produce and promote alternative knowledge and analysis which enables popular movements for social, economic and ecological justice to engage with the intersecting crises flowing from the natural, economic and social challenges confronting humanity.
Programmes

• Economic Justice

• Building Counter Power

• Alternatives to Extractivism and Climate Change
But how do we achieve this?

 Ranked 6th in terms of renewable energy production potential.
Sustainable Schools
Environmental Benefits of the Smithsonian Gardens Tree Collection

- 383,795 Gallons of Rainwater Intercepted Annually*
- 2,699 Pounds of Air Pollutants Removed Annually (Equivalent of taking 10 cars off the road for a year)
- 37,877 Pounds of Carbon Sequestered Annually

*‘Interception’ is the rainfall intercepted by the canopy of a tree that subsequently evaporates from the leaves, thereby preventing runoff into storm drains.

Note: There are 40 acres of woodland at the Smithsonian’s facility in Suitland, MD that provide the same benefits. However, data on these trees is not included in this infographic.
Together we can #FixOurSchools, resist and adapt to climate change, and create jobs at the same time!
